SUBCLAVIAN DOUBLE LUMEN HEMODIALYSIS SETS AND TRAYS

Used for blood withdrawal and infusion.

- The double lumen construction allows blood withdrawal through the proximal port and infusion through the distal port.
- The Peel-Away® sheath allows the catheter to be introduced percutaneously.
- The swivel fitting allows the catheter tip to be rotated within the vessel without removing the tie-down sutures.

Supplied sterile in peel-open packages. Intended for one-time use.

Trays also include: **11 French** - 25 gage needle, 22 gage needle, needle holder, lidocaine, povidone-iodine swabsticks, fenestrated drape, gauze sponges, disposable syringes, disposable scalpel, suture with needle, CSR wrap and prep tray; **16 French** - 25 gage needle, 19 gage introducer needle, needle holder, lidocaine, povidone-iodine swabsticks, fenestrated drape, gauze sponges, disposable syringes, disposable scalpel, suture with needle, CSR wrap and prep tray.

*The Quick Reorder Number is for U.S.A. domestic use only.*
**PEDIATRIC ACUTE PERITONEAL DIALYSIS SET**

Used to administer dialysis solution into the peritoneal cavity. Supplied sterile in peel-open packages. Intended for one-time use.

Also included: Connecting tube and sampling port.

TENCKHOFF ACUTE PERITONEAL DIALYSIS CATHETERS AND SETS

ONE CUFF

Used for acute access to the peritoneal cavity.
- Peel-Away® sheath allows the catheter to be introduced percutaneously.
- Synthetic fiber cuff is affixed to catheter to allow tissue ingrowth.
- Sideports are spiraled.

Supplied sterile in peel-open packages. Intended for one-time use.
