The Right Combination

Minocycline+rifampin is the most rigorously studied and synergistic combination of antibiotics available on a catheter for reducing CRBSIs through two distinct mechanisms of action. Unlike most antibiotics, this combination has the ability to penetrate the biofilm that forms on all indwelling catheters.1

Unmatched Evidence

Two decades of evidence, including more than 21 peer-reviewed studies and meta-analyses, confirm minocycline+rifampin catheters are the most effective tool available to provide broad-spectrum protection against gram-positive, gram-negative and fungal infections in both short- and long-term use.2,3 It’s evidence of protection no other process or technology can match.

No Evidence of Resistance

More than 10 years of clinical use has shown no evidence that M+R catheters lead to bacterial resistance, and a seven-year study of over 500,000 catheter days confirms these results.4 A separate study indicates that a facility using M+R catheters may have shown a decrease in vancomycin usage.5

Worth Switching

In a challenging clinical environment, a hospital that switches to M+R catheters may expect to see a decrease in CRBSI rates, attributable mortality and CRBSI-related costs. Even high-performing hospitals can switch to Spectrum to drive incremental improvement in CRBSI rates and may still achieve substantial reductions in mortality and expenses.

Central Venous Catheters

Cook Spectrum® Minocycline+Rifampin Impregnated Central Venous Catheter
MULTILUMEN - POLYURETHANE
Used for venous pressure monitoring, blood sampling and administration of drugs and fluids.

COMPONENTS
- Cook Spectrum central venous catheter with hydrophilic coating and Luer-lock end caps*
- Safe-T-J® double flexible-tipped wire guide
- Dilator
- FEP catheter introducer needle
- 6 mL syringe
- Red sharps needle holder

* Available only on 7.0 and 10.0 Fr CVCs.

Sussmane-Raszynski Adjustable Flange Intraosseous Infusion Needle

Used as an alternative to intravenous access during pediatric emergencies, permitting infusion of drugs and fluids.

**FEATURES & BENEFITS**

- Adjustable threaded flange allows control of needle insertion depth.
- Two laterally-opposed sideports near the distal tip of the needle cannula ensure flow if needle tip is obstructed by posterior bone cortex.

Ciaglia Blue Rhino® G2 Advanced Percutaneous Tracheostomy Introducer Set
Used for controlled, elective subcricoid insertion of a tracheostomy tube.

COMPONENTS
- Ciaglia Blue Rhino G2 percutaneous tracheostomy dilator with preloaded guiding catheter
- .052 inch diameter wire guide with positioning marks
- Tracheostomy tube loading dilators
- 15 gage, 7 cm introducer needle
- 15 gage, 7 cm FEP sheath needle
- 14.0 Fr, 4.5 cm dilator
- Disposable #15 scalpel
- Disposable syringe
- Red sharps needle holder
- Lubricating jelly
- Gauze sponges

VersaTube™ Tapered Tracheostomy Tube

FEATURES & BENEFITS
• Long length options enable use in a wider variety of patient types.
• Tapered distal tip creates a smooth transition from loading obturator to tracheostomy tube.
• Colour-coding system facilitates simple and efficient identification of desired tube and inner cannula size.
• Soft PVC blend material gently conforms to patient anatomy to maximise comfort and help prevent damage to internal structures.

COMPONENTS
• Colour-coded inner cannulas

Difficult Airway Products

Frova Intubating Introducer
Used to facilitate endotracheal intubation in patients where visualisation of the glottis is inadequate.

FEATURES & BENEFITS
- Blunt, curved tip can be passed blindly into the trachea when visualisation of the glottis is inadequate to guide placement of endotracheal tube.
- Distal sideports help ensure sufficient airflow and prevent catheter from whipping during jet ventilation.
- Centimeter markings facilitate accurate placement with endotracheal tubes.
- Radiopaque to enhance x-ray visualisation.
- Removable Rapi-Fit® adapter with 15 mm and Luer lock connectors permits use of ventilatory device if necessary during exchange procedure.
- Catheter material allows shaping to individual preferences and needs.

COMPONENTS
- Radiopaque catheter
- Rapi-Fit adapter (15 mm connector)
- Rapi-Fit adapter (Luer lock connector)

Patil Intubation Catheter
Used to facilitate endotracheal intubation and to allow simple endotracheal tube exchange.

FEATURES & BENEFITS
• Use of removable Rapi-Fit® adapter permits use of ventilatory device if necessary during exchange procedure.

COMPONENTS
• Two-part catheter
• Rapi-Fit adapter (15 mm connector)
• Rapi-Fit adapter (Luer lock connector)

Aintree Intubation Catheter
Used for assisted fiberoptic intubation and for uncomplicated, atraumatic endotracheal tube exchange.

**FEATURES & BENEFITS**
- Large 4.7 mm inner diameter to accept fiberoptic bronchoscope.
- Blunt tip is atraumatic to internal structures.
- Distal sideports help ensure sufficient airflow and prevent catheter from whipping during jet ventilation.
- Centimeter markings facilitate accurate placement with endotracheal tubes.
- Removable Rapi-Fit® adapter with 15 mm and Luer lock connectors permits use of ventilatory device if necessary during exchange procedure.

Difficult Airway Products

Cook® Airway Exchange Catheter
EXTRA FIRM WITH SOFT TIP
Used for uncomplicated, atraumatic endotracheal tube exchange or double-lumen endobronchial tube exchange.

FEATURES & BENEFITS
• Blunt, soft, flexible tip of catheter is atraumatic to internal structures. Distal 7 cm of catheter is flexible.
• Extra-firm catheter facilitates exchange of double-lumen tubes.
• Distal sideports help ensure sufficient airflow and prevent catheter from whipping during jet ventilation.
• Centimeter markings facilitate accurate placement with endotracheal tubes.
• Removable Rapi-Fit® adapter with 15 mm and Luer lock connectors permits use of ventilatory device if necessary during exchange procedure.

COMPONENTS
• Radiopaque catheter
• Rapi-Fit adapter (15 mm connector)
• Rapi-Fit adapter (Luer lock connector)

Enk Fiberoptic Atomiser Set

Used for atomising local anaesthetics in connection with flexible fiberoptic intubation techniques.

FEATURES & BENEFITS

• Provides adequate topical anaesthesia by atomising small doses of local anaesthetics through the working channel of the bronchoscope using a flow of oxygen.

• Reduced doses of anaesthetics and the atomiser effect enhance patient comfort.

• Repeated administration of local anaesthetic solutions and a flow of oxygen (“spray as you go”) keep the front lens clear during bronchoscope advancement.

COMPONENTS

• Introducer catheter

• Connecting tube with atomiser

Arndt Airway Exchange Catheter Set
Used for the exchange of laryngeal mask airways (LMA) and endotracheal tubes using a fiberoptic bronchoscope.

FEATURES & BENEFITS
• May be used for emergency, urgent and elective airway management.
• Removable Rapi-Fit adapter permits use of ventilatory device if necessary during exchange procedure.
• Through-lumen design of catheter with distal sideports ensures adequate airflow.

COMPONENTS
• Radiopaque catheter
• Amplatz extra stiff wire guide
• Rapi-Fit adapter (15 mm connector)
• Rapi-Fit adapter (Luer lock connector)
• Bronchoscopic port

Mizus Mettro® Endotracheal Tube Replacement Obturator

Used for uncomplicated, atraumatic endotracheal and tracheostomy tube exchange.

**FEATURES & BENEFITS**
- The obturator’s flexibility, positioning marks and soft, tapered atraumatic tip design facilitate expedient tube exchange.

**COMPONENTS**
- Radiopaque obturator

Difficult Airway Products

Cook® Retrograde Intubation Set
Used to assist in the placement of an endotracheal tube during difficult airway access procedures.

FEATURES & BENEFITS
• Initial access using the Seldinger technique via the cricothyroid membrane permits retrograde (cephalad-directed) placement of a wire guide exiting orally or nasally.
• Antegrade introduction of a hollow guiding catheter with distal sideports and Rapi-Fit® adapters allows patient oxygenation and facilitates placement of an endotracheal tube.

COMPONENTS
• Introducer needle
• FEP introducer needle
• Syringe
• Wire guide with positioning marks
• Retrograde intubating catheter
• Rapi-Fit adapter (15 mm connector)
• Rapi-Fit adapter (Luer lock connector)
• Hemostat

Difficult Airway Products

Enk Oxygen Flow Modulator Set
Used with emergency transtracheal catheter ventilation when conventional ventilation by mask or endotracheal tube cannot be performed.

FEATURES & BENEFITS
- Allows manually controlled oxygen flow.
- Kink-resistant, wire-reinforced catheter to prevent collapse once placed.
- Includes Emergency Transtracheal Airway Catheter tubing for attachment to oxygen source and Enk flow modulator.

COMPONENTS
- Catheter needle
- Syringe
- Enk Oxygen Flow Modulator
- Emergency Transtracheal Airway Catheter tubing

Difficult Airway Products

Patil Emergency Cricothyrotomy Catheter Set
Used for emergency airway access when conventional endotracheal intubation cannot be performed.

FEATURES & BENEFITS
- Airway access is achieved by direct percutaneous puncture via the cricothyroid membrane.
- Catheter is coil reinforced and kink resistant, and has a standard 15 mm connector and Luer lock connector.

COMPONENTS
- Scalpel
- Needle introducer assembly
- Syringe
- Cricothyrotomy catheter

Arndt Emergency Cricothyrotomy Catheter Set
Used for emergency airway access when conventional endotracheal intubation cannot be performed.

FEATURES & BENEFITS
• Airway access is achieved by percutaneous entry (Seldinger) technique via the cricothyroid membrane.
• Subsequent dilation of the tract and tracheal entrance site permits passage of the emergency airway.

COMPONENTS
• Introducer needle
• FEP introducer needle
• Syringe
• Amplatz extra-stiff wire guide
• Airway catheter assembly
• Connecting tube

Melker Universal Emergency Cricothyrotomy Catheter Set
Used for emergency airway access when conventional endotracheal intubation cannot be performed.

FEATURES & BENEFITS
• Airway access is achieved by standard wire-guided (Seldinger) technique via the cricothyroid membrane.

COMPONENTS
Seldinger Technique
• Introducer needle
• FEP catheter introducer needle
• Syringe
• Scalpel
• Wire guide
• Curved dilator
• Airway catheter

Surgical Technique
• #11 safety scalpel
• Trousseau dilators
• Tracheal hook
• Blunt, curved dilator
• Trach tape

Melker Emergency Cuffed Cricothyrotomy Catheter Set

Used for emergency airway access when conventional endotracheal intubation cannot be performed.

**FEATURES & BENEFITS**

- Airway access is achieved by standard wire-guided (Seldinger) technique via the cricothyroid membrane.
- Subsequent dilation of the tract and tracheal entrance site permits passage of the emergency airway.
- Catheter is cuffed to protect and control airway.
- Airway catheter is radiopaque and has standard 15 mm connector.

**COMPONENTS**

- Two 18 gage introducer needles, 5 and 7 cm long
- FEP catheter introducer needle
- Syringe
- Scalpel
- Wire guide
- Curved dilator
- Cuffed airway catheter
- Trach tape

Arndt Endobronchial Blocker Set
Used for wire-guided endobronchial blockade of the left or right lung for procedures which require one-lung ventilation.

FEATURES & BENEFITS
• Adjustable guide loop coupled with an appropriately sized bronchoscope enables precise placement.
• Low-pressure, high-volume balloon creates excellent surface area contact with the inner bronchial wall while minimising potential trauma to the bronchus.
• Distance markings show how far the blocker has been advanced.
• Suction adapter included with set offers another method of lung deflation.

Cohen Endobronchial Blocker Set
Used for tip-deflecting, wire-guided endobronchial blockade of the left or right lung for procedures which require one-lung ventilation.

FEATURES & BENEFITS
• Unique deflecting tip provides wide range of motion to precisely direct the blocker under bronchoscopic guidance.
• Indicator arrow on the turning wheel shows which direction the tip deflects, ensuring reliable access to the desired lung.
• High-traction, silicone grip on introducer shaft increases operator control, resulting in more precise device placement.
• Low-pressure, high-volume balloon creates excellent surface area contact with the inner bronchial wall while minimising potential trauma to the bronchus.
• Distance markings show how far the blocker has been advanced.
• Suction adapter included with set offers another method of lung deflation.

Wayne Pneumothorax Set
Used for the relief of simple, spontaneous, iatrogenic and tension pneumothorax.

FEATURES & BENEFITS
• Seldinger or trocar placement.
• Percutaneous (Seldinger) placement facilitates controlled, minimally invasive catheter introduction.
• Enlarged sideports enhance drainage of air.
• Radiopaque catheter enhances x-ray visualisation.

COMPONENTS
Seldinger Set*
• 5 cm EchoTip® echogenic introducer needle
• 9 cm introducer needle
• Wire guide
• Dilator
• Catheter obturator
• Pigtail catheter
• Cook Chest Drain Valve

Trocar Set
• Needle obturator
• Pigtail catheter
• Cook Chest Drain Valve

*Sets also include scalpel, three-way stopcock and connecting tube.

**Cook® Emergency Pneumothorax Set**

*Used for emergency relief and temporary management of suspected tension pneumothorax.*

**FEATURES & BENEFITS**
- Catheter-over-needle placement.
- Reinforced catheter prevents collapse after placement.
- Cook Chest Drain Valve permits continued re-expansion of the lung by natural forces, preventing inadvertent backflow of air into the pleural space.

**COMPONENTS**
- Catheter introducer needle
- Cook Chest Drain Valve
- One-way stopcock
- Connecting tube
- Catheter fixation device
- Syringe
- Transparent tape

Thal-Quick Chest Tube Set
SINGLE LUMEN
Used for pleural fluid drainage.

FEATURES & BENEFITS
• Percutaneous (Seldinger) placement facilitates controlled, minimally invasive catheter introduction.
• EchoTip® echogenic introducer needle enhances needle tip visibility under ultrasound imaging.
• Radiopaque catheter enhances x-ray visualisation.
• Marked dilator facilitates controlled insertion of chest tube into the pleural cavity.

SET COMPONENTS
• Scalpel
• EchoTip echogenic introducer needle
• Amplatz Extra-Stiff Wire Guide
• Marked dilator
• Chest tube inserter
• Thal-Quick Chest Tube

Fuhrman Pleural/Pneumopericardial Drainage Set

Used for evacuation of air from the pericardial sac or to drain air or fluid from the pleural space.

FEATURES & BENEFITS

• Percutaneous (Seldinger) placement facilitates controlled, minimally invasive catheter introduction.
• Sideports positioned within catheter pigtail.
• Centimeter markings on pigtail catheter.*
• Radiopaque catheter enhances x-ray visualisation.

COMPONENTS

• Introducer needle
• Wire guide
• Dilator
• Radiopaque pigtail catheter
• Three-way stopcock
• Multipurpose tubing adapter

---

**Features & Benefits**

- Percutaneous (Seldinger) placement facilitates controlled, minimally invasive catheter introduction.
- Sideports positioned within catheter pigtail.
- Centimeter markings on pigtail catheter.*
- Radiopaque catheter enhances x-ray visualisation.

**Components**

- Introducer needle
- Wire guide
- Dilator
- Radiopaque pigtail catheter
- Three-way stopcock
- Multipurpose tubing adapter

---

*Only sets with “WCE” in order number have cm markings on pigtail catheter.

---

### Centesis and Drainage: Multipurpose Catheters

#### Fuhrman Pleural/Pneumopericardial Drainage Set

Used for evacuation of air from the pericardial sac or to drain air or fluid from the pleural space.

**Features & Benefits**

- Percutaneous (Seldinger) placement facilitates controlled, minimally invasive catheter introduction.
- Sideports positioned within catheter pigtail.
- Centimeter markings on pigtail catheter.*
- Radiopaque catheter enhances x-ray visualisation.

**Components**

- Introducer needle
- Wire guide
- Dilator
- Radiopaque pigtail catheter
- Three-way stopcock
- Multipurpose tubing adapter

---

*Only sets with “WCE” in order number have cm markings on pigtail catheter.

---
