When seconds matter, what’s your plan?

PRODUCTS FOR THE DIFFICULT AIRWAY
Establish and maintain an airway, even in the most critical situations.

We designed our airway management products to facilitate successful intubation, airway exchange, and emergency airway access.

Visit cookairway.com for procedural videos, additional information, or to contact your local sales representative for a product demonstration.

- Melker Cuffed Emergency Cricothyrotomy Catheter Set - Surgical
- Melker Emergency Special-Operations Cricothyrotomy Catheter Set - Seldinger
- Emergency Transtracheal Airway Catheter

Difficult airway resources
When you can’t intubate but can ventilate, we have a solution.
Intubation

Our intubating introducers allow you to provide oxygen during the initial intubation and can assist with blind, retrograde, and bronchoscopic-guided placement.
Frova Intubating Introducer
Intended to facilitate endotracheal intubation in patients where the visualization of the glottis is inadequate.

Features and benefits
- The blunt, angled tip helps you properly place the introducer beyond the vocal cords and into the trachea, minimizing trauma to internal structures.
- The optional stiffening cannula adds rigidity to the proximal and middle sections of the catheter, while the distal portion remains flexible.
- The lumen and distal sideports are designed to deliver oxygen.
- The centimeter marks facilitate accurate alignment with endotracheal tubes.
- The removable Rapi-Fit® Adapter permits oxygen delivery, if necessary.

Components
- Frova Intubating Introducer
- Stiffening cannula
- Rapi-Fit Adapter (15 mm connector)
- Rapi-Fit Adapter (Luer lock connector)

1. Endotracheal tube not included.
2. Packaged in a U-shape for portability and easy transportation.

Some products or part numbers may not be available in all markets. Contact your local Cook Medical sales representative or Customer Service for details.
Rapi-Fit® Adapter

Our removable Rapi-Fit Adapters can be used with 15 mm or Luer lock connectors. The adapters allow our airway catheters to be attached to ventilation devices to provide oxygenation during intubation or airway exchange procedures, if necessary.

A Rapi-Fit Adapter is included with select intubation and airway exchange products.

To attach
Position the adapter on the catheter. Push the white collar forward and lock the adapter into position.

To remove
Pull the white collar back to release and remove the adapter from the catheter.
Cook® Retrograde Intubation Set

Intended to assist in the placement of an endotracheal tube during difficult or emergency airway access procedures where visualization of the vocal cords is not possible secondary to secretions, blood, and/or anatomic anomalies.

Features and benefits

• Using the Seldinger technique via the cricothyroid membrane for initial access permits retrograde (cephalad) placement of a wire guide that exits orally or nasally.
• The catheter’s tapered tip allows for smoother navigation through the patient’s anatomy.
• Antegrade introduction of a hollow guiding catheter with distal sideports and Rapi-Fit Adapters allows you to provide the patient with oxygen and facilitates placement of an endotracheal tube.

Components

• Cook Retrograde Intubation Catheter
• Introducer needle
• PTFE introducer needle
• Syringe
• Straight and 3 mm J-tip wire guide with positioning marks
• Hemostat
• Rapi-Fit Adapter (15 mm connector)
• Rapi-Fit Adapter (Luer lock connector)

Some products or part numbers may not be available in all markets. Contact your local Cook Medical sales representative or Customer Service for details.
Aintree Intubation Catheter
Intended for assisted fiberoptic intubation and for uncomplicated, atraumatic endotracheal tube exchange.

Features and benefits
- The catheter’s inner diameter (ID), lumen, and distal sideports are designed to enhance airflow.
- The large ID permits the use of a bronchoscope, which enhances visualization.
- The centimeter marks facilitate accurate alignment with endotracheal tubes.
- The removable Rapi-Fit Adapter permits oxygen delivery, if necessary.

Components
- Aintree Intubation Catheter
- Bronchoscopic port
- Rapi-Fit Adapter (15 mm connector)
- Rapi-Fit Adapter (Luer lock connector)

We can help make the exchange process uncomplicated and atraumatic.
Airway exchange

Our radiopaque exchange catheters are available in a wide range of sizes, and are hollow to allow oxygen delivery during exchange. By maintaining continuous airway access, our products can reduce the chance for adverse patient outcomes due to oxygen deprivation.
Cook® Airway Exchange Catheter
Intended for uncomplicated, atraumatic endotracheal tube exchange.

Features and benefits
• The blunt tip of the catheter is atraumatic to internal structures.
• The lumen and distal sideports are designed to deliver oxygen.
• The centimeter markings facilitate accurate alignment with endotracheal tubes.
• The removable Rapi-Fit Adapter permits oxygen delivery during an exchange procedure, if necessary.

Components
• Cook Airway Exchange Catheter
• Rapi-Fit Adapter (15 mm connector)
• Rapi-Fit Adapter (Luer lock connector)

Arndt Airway Exchange Catheter Set
Intended for the exchange of laryngeal mask airways and endotracheal tubes using a fiberoptic bronchoscope, bronchoscopic port, wire guide, and exchange catheter.

Features and benefits
• The set may be used for emergency, urgent, and elective airway management.
• The use of a bronchoscope enhances visualization to facilitate clearer navigation through the patient’s anatomy.
• The wire guide can be inserted through the working channel of the bronchoscope, which allows acute angles to be maneuvered.
• The distal sideports facilitate airflow.
• The removable Rapi-Fit Adapter permits the use of an oxygen source during an exchange procedure, if necessary.

Components
• Arndt Airway Exchange Catheter
• Amplatz Extra-Stiff Support Wire Guide
• Bronchoscopic port
• Rapi-Fit Adapter (15 mm connector)
• Rapi-Fit Adapter (Luer lock connector)

Cook® Airway Exchange Catheter - Extra-Firm with Soft Tip

Intended for uncomplicated, atraumatic endotracheal tube exchange.

**Features and benefits**
- The blunt, soft, and flexible tip of the catheter is atraumatic to internal structures. The distal section of the catheter is flexible.
- The extra-firm catheter facilitates the exchange of double-lumen shaft tubes.
- The lumen and distal sideports are designed to deliver oxygen.
- The centimeter markings facilitate accurate alignment with endotracheal tubes.
- The removable Rapi-Fit Adapters permit oxygen delivery during an exchange procedure, if necessary.

**Components**
- Cook Airway Exchange Catheter
- Rapi-Fit Adapter (15 mm connector)
- Rapi-Fit Adapter (Luer lock connector)

When you can’t intubate or ventilate, our tools help you gain emergency airway access.
Emergency airway

We offer a variety of emergency cricothyrotomy kits for use with Seldinger or surgical methods. Some of our kits include a cuffed airway catheter, and we offer products for emergency transtracheal airway catheter ventilation.
Melker Universal Cuffed Emergency Cricothyrotomy Catheter Set
Seldinger/Surgical
Intended to establish emergency airway access when endotracheal intubation cannot be performed.

Features and benefits
- The universal set provides all the components you need in one package to perform a cricothyrotomy with either the Seldinger or the surgical technique.
- The airway catheter is cuffed to protect and control the airway after it is placed.

Components
- Melker Cuffed Emergency Cricothyrotomy Catheter
- Introducer needle
- PTFE catheter introducer needle
- 12 mL syringe
- #15 mini scalpel
- Amplatz Extra-Stiff Support Wire Guide
- Curved dilator
- Trousseau dilator
- Trachheal hook
- Blunt, curved dilator
- Tracheostomy tape
- Needle holder cup
- Ten gauze sponges
- Drape

Melker Emergency Cricothyrotomy Catheter Set
Seldinger

Intended to establish emergency airway access when endotracheal intubation cannot be performed.

Features and benefits
- Airway access is achieved by using the Seldinger technique via the cricothyroid membrane.
- The uncuffed airway catheter comes in three different sizes to address a variety of patient anatomies.

Components
- Melker Emergency Cricothyrotomy Catheter
- Introducer needle
- PTFE catheter introducer needle
- 6 mL syringe

Melker Cuffed Emergency Cricothyrotomy Catheter Set

Surgical

Intended to establish emergency airway access when endotracheal intubation cannot be performed.

Features and benefits

- Airway access is achieved by using the surgical technique via the cricothyroid membrane.
- The airway catheter is cuffed to protect and control the airway after it is placed.
- The set is supplied in a compact package for easy storage.

Components

- Melker Cuffed Emergency Cricothyrotomy Catheter
- Safety scalpel
- Trousseau dilator
- Tracheal hook
- Curved dilator
- 6 mL syringe
- Tracheostomy tape

Melker Emergency Special-Operations Cricothyrotomy Catheter Set
Seldinger
Intended to establish emergency airway access when endotracheal intubation cannot be performed.

**Features and benefits**
- Airway access is achieved by using the Seldinger technique via the cricothyroid membrane.
- Each set is supplied in a slip-peel pouch for easy transportation in emergency vehicles.
- The dilators are preinserted into the airway catheters for quick access.
- Each set includes two introducer needles, 5 cm and 7 cm long, to address a variety of patient anatomies.
- The set with the cuffed catheter is cuffed to protect and control the airway after it is placed.
- The set with the uncuffed catheter comes with two airway catheter size options.

**Components**
- Melker Emergency Cricothyrotomy Catheter
- Two 18 gage introducer needles, 5 cm and 7 cm long
- 6 mL syringe
- #15 mini scalpel
- Amplatz Extra-Stiff Support Wire Guide
- Curved dilator

Emergency Transtracheal Airway Catheter
Intended for emergency airway access when conventional endotracheal intubation cannot be performed.

**Features and benefits**
- The catheter is coil reinforced to prevent kinking.

**Components**
- Emergency Transtracheal Airway Catheter
- Preassembled introducer needle
- Reinforced FEP catheter
