Wayne Pneumothorax Catheter Set and Tray - Seldinger

Used for the relief of simple, spontaneous, iatrogenic, and tension pneumothorax.

Features and benefits

• Seldinger placement facilitates controlled, minimally invasive catheter introduction.
• The set comes with the Cook Chest Drain Valve, which is designed to help remove air from the pleural cavity.
• The enlarged sideports are designed to facilitate the drainage of air.
• The radiopaque catheter material enhances x-ray visualization.
• Pigtail catheters have a comparable efficacy to chest tubes in patients with pneumothorax.¹

Some products or part numbers may not be available in all markets. Contact your local Cook Medical sales representative or Customer Support & Delivery for details.

2. This set does not include the Cook Chest Drain Valve.

Monoject is a registered trademark of Covidien AG.
Wayne Pneumothorax Catheter Set - Trocar

Used for the relief of simple, spontaneous, iatrogenic, and tension pneumothorax.

Features and benefits

• The needle obturator comes pre-assembled within the Wayne Pneumothorax Catheter to allow for direct-stick insertion.
• The set comes with the Cook Chest Drain Valve, which is designed to help remove air from the pleural cavity.
• The enlarged sideports are designed to facilitate the drainage of air.
• The radiopaque catheter material enhances x-ray visualization.
• Pigtail catheters have a comparable efficacy to chest tubes in patients with pneumothorax.*

Pneumothorax Set and Tray

Used for the relief of simple, spontaneous, or iatrogenic pneumothorax and tension pneumothorax.

Features and benefits
- The straight catheter is used for trocar placement.
- The set comes with the Cook Chest Drain Valve, which is designed to help remove air from the pleural cavity.
- The radiopaque catheter material enhances x-ray visualization.

Richli Pneumothorax Catheter Set

Used for the relief of simple, spontaneous, or iatrogenic pneumothorax and tension pneumothorax.

Features and benefits

• Seldinger placement facilitates controlled, minimally invasive catheter introduction.
• The 8.5 Fr catheter is designed for smaller patient anatomies.
• The catheter features a Simp-Loc® locking mechanism to aid in stabilizing catheter retention within the body.
• Sideports are positioned within the catheter pigtail and are designed to aid in drainage.
• The set comes with the Cook Chest Drain Valve, which is designed to help remove air from the pleural cavity.

### Features and benefits
- Seldinger placement facilitates controlled, minimally invasive catheter introduction.
- The centimeter-marked dilators allow for additional control over the insertion of a chest tube into the pleural space.
- The sideports are positioned at the distal end of the chest tube.
- The clear polyvinylchloride catheter with a radiopaque stripe allows fluid to be seen during the drainage procedure.
- The most proximal side hole is positioned on the radiopaque stripe to aid in confirming catheter positioning via x-ray.
- The double lumen set has an additional lumen available for aspiration or infusion.
- The Thal-Quick Chest Tube Adapter is sold separately (see page 22).

### Thal-Quick Chest Tube Set
Used for the percutaneous introduction of a chest tube for pleural fluid drainage.

Additional components

- 5 mL of lidocaine
- 22 and 25 gage Monoject needles
- 3 and 12 mL Monoject syringes
- 30 x 30 inch CSR wrap
- 24 x 36 inch fenestrated drape
- BD Chloraprep Hi-Lite Orange
- 4 x 4 inch gauze sponges (pack of 10)
# Fuhrman Pleural/Pneumopericardial Drainage Set

Used for evacuation of air from the pericardial sac or drainage of air or fluid from the pleural space.

**Features and benefits**

- Seldinger placement facilitates controlled, minimally invasive catheter introduction.
- The catheter is available in a variety of sizes, ranging from 5-12 Fr, to cater to different patient anatomies.
- Sideports are positioned within the catheter pigtail and are designed to aid in drainage.
- Centimeter markings on the pigtail catheter guide insertion.
- The catheter material has radiopaque properties.
- Pigtail catheters have been shown to have a comparable efficacy to chest tubes in patients with pneumothorax.1

Pericardiocentesis Set - Straight Catheter

Used to remove fluid from the pericardial sac.

Features and benefits

- Seldinger placement facilitates controlled, minimally invasive catheter introduction.
- The radiopaque catheter material enhances x-ray visualization.
- The stainless steel hub of the entry needle set permits constant electrocardiographic monitoring via alligator clip cable.

Pericardiocentesis Set - Pigtail Catheter

Used to remove fluid from the pericardial sac.

Features and benefits

- Seldinger placement facilitates controlled, minimally invasive catheter introduction.
- The radiopaque catheter material enhances x-ray visualization.
- Sideports are positioned within the catheter pigtail and are designed to aid in drainage.

1. Includes marked catheter, dilator, and needle.
2. Includes a one-part reusable needle, an alligator clip cable, and a three-way stopcock.

**Set components**

- LOCK PERICARDIOCENTESIS CATHETER
- DILATOR
- SAFE-T-J PTFE-COATED FIXED CORE WIRE GUIDE
- ONE-PART PERCUTANEOUS ENTRY NEEDLE
- PLASTIC MULTIPURPOSE TUBING ADAPTER

**Additional tray components**

- 5 mL of lidocaine
- 22 and 25 gage Monoject needles
- 6 and 12 mL Monoject syringes
- BD ChloraPrep
- 30 x 30 inch CSR wrap
- 24 x 36 inch fenestrated drape
- 4 x 4 inch gauze sponges (pack of 10)
- Braided silk suture
- Needle holder cup
Teitel Pericardiocentesis Set

Used to remove fluid from the pericardial sac.

Features and benefits
- Seldinger placement facilitates controlled, minimally invasive catheter introduction.
- The stainless steel hub of the entry needle permits constant electrocardiographic monitoring via alligator clip cable.
- The radiopaque catheter material enhances x-ray visualization.

Set components

Additional tray components
- 5 mL of lidocaine
- Braided black silk suture
- 22 and 25 gage Monoject needles
- 3 and 6 mL Monoject syringes
- #11 thumb scapel
- 4 x 4 inch gauze sponges (pack of 10)
- Needle holder cup
- BD ChloraPrep
- 30 x 30 inch CSR wrap
- 18 x 24 inch fenestrated drape
**Simple Pneumothorax Aspiration Accessory Set**

Used in conjunction with a pneumothorax aspiration catheter if incomplete expansion of the lung persists after mechanical aspiration of air.

**Features and benefits**

- The set comes with the Cook Chest Drain Valve, which is designed to help remove air from the pleural cavity.
- The Cook Chest Drain Valve can be used for the transportation of patients who need to have pleural drainage catheters in place for long durations, or for outpatient procedures.
