When you can’t intubate but can ventilate, we have a solution.
Intubation

Our intubating introducers allow you to provide oxygen during the initial intubation and can assist with blind, retrograde, and bronchoscopic-guided placement.
Frova Intubating Introducer

The Frova Intubating Introducer is intended to facilitate endotracheal intubation in adult patients where visualization of the glottis is inadequate.

The 8 Fr Frova Intubating Introducer is indicated for both adult and pediatric patients.1

Product details

- The blunt, angled tip is designed to help you properly place the intubating introducer beyond the vocal cords and into the trachea.
- The optional stiffening stylet2 adds rigidity to the proximal and middle sections of the intubating introducer, while the distal portion remains flexible.
- The lumen and sideports are channels by which oxygen may be delivered when the device is used with Rapi-Fit® Adapters and an oxygen source.1
- The centimeter marks on the intubating introducer facilitate alignment with endotracheal tubes.
- The removable Rapi-Fit® Adapter permits oxygen delivery, if necessary.1

Components

- Frova Intubating Introducer
- Stiffening stylet2
- Rapi-Fit® Adapter (15 mm connector)
- Rapi-Fit® Adapter (Luer lock connector)

1. The 8 Fr catheter is recommended for placement of an endotracheal tube with an inner diameter of 3 mm or larger. When used for high-pressure oxygenation with a Luer lock connector, the 8 Fr catheter is recommended for patients older than 1 month of age.
2. May also be referred to as a “cannula.”
3. Endotracheal tube not included.
4. Packaged in a U-shape for portability and easy transportation.

For complete instructions, age-specific recommendations, contraindications, warnings, and precautions, see the Instructions for Use included with each product. Some products or part numbers may not be available in all markets. Contact your local Cook representative or Customer Support & Distribution for details.
Rapi-Fit® Adapter

Our removable Rapi-Fit Adapters can be attached to our airway catheters to connect to a ventilation device, if necessary.

A 15 mm and Luer lock Rapi-Fit Adapters are included with several of our airway catheters. The 15 mm Rapi-Fit Adapter can also be ordered separately (for use with the 14 Fr Frova intubating introducer).

15 mm Rapi-Fit Adapter

To attach
Position the adapter on the catheter. Push the white collar forward and lock the adapter into position.

To remove
Pull the white collar back to release and remove the adapter from the catheter.

Luer lock Rapi-Fit Adapter
Cook® Retrograde Intubation Set

Intended to assist in intubation during difficult airway access procedures in adult and pediatric patients.¹

Product details

- Using the Seldinger technique via the cricothyroid membrane for initial access permits retrograde (cephalad) placement of a wire guide that exits orally or nasally.
- The catheter’s tapered tip allows for smoother navigation through the patient’s anatomy.
- Antegrade introduction of a hollow guiding catheter with distal sideports and Rapi-Fit Adapters allows you to provide the patient with oxygen and facilitates placement of an endotracheal tube.¹

Components

- Cook® Retrograde Intubation Catheter
- Catheter access needle
- One-part percutaneous entry needle
- 6 mL syringe
- Straight and curved double flexible-tipped wire guide with positioning marks
- Disposable serrated hemostat
- Rapi-Fit® Adapter (15 mm connector)
- Rapi-Fit® Adapter (Luer lock connector)

¹Endotracheal tube not included.

1. The 6 Fr intubation catheter is recommended for placement of an endotracheal tube with an inner diameter of 2.5 mm or larger.
2. The 11 Fr intubation catheter is recommended for placement of an endotracheal tube with an inner diameter of 4.0 mm or larger.
3. The 14 Fr intubation catheter is recommended for placement of an endotracheal tube with an inner diameter of 5.0 mm or larger. When used for high-pressure oxygenation with a Luer lock connector, the 14 Fr intubation catheter is recommended for patients older than 12 years of age.

For complete instructions, age-specific recommendations, contraindications, warnings, and precautions, see the Instructions for Use included with each product. Some products or part numbers may not be available in all markets. Contact your local Cook representative or Customer Support & Distribution for details.
Aintree Intubation Catheter

Intended for exchange of a supraglottic airway device (SAD) to an endotracheal tube (ETT) under bronchoscopic assistance, and for ETT exchange in adult and pediatric patients.¹

**Product details**
- The lumen and distal sideports are designed to deliver oxygen.
- The large ID permits the use of a bronchoscope with a maximum outer diameter of 4.2 mm.
- The centimeter marks facilitate alignment with endotracheal tubes.
- The removable Rapi-Fit Adapter permits oxygen delivery, if necessary.¹

**Components**
- Aintree Intubation Catheter
- Bronchoscopic port
- Rapi-Fit® Adapter (15 mm connector)
- Rapi-Fit® Adapter (Luer lock connector)

¹Endotracheal tube not included.

1. The 19 Fr catheter is recommended for use with a supraglottic airway device and placement of a single-lumen endotracheal tube with an inner diameter of 7 mm or larger. When used for high-pressure oxygenation with a Luer lock connector, the 19 Fr catheter is recommended for patients older than 12 years of age.

For complete instructions, age-specific recommendations, contraindications, warnings, and precautions, see the Instructions for Use included with each product. Some products or part numbers may not be available in all markets. Contact your local Cook representative or Customer Support & Distribution for details.
We can help make the exchange process uncomplicated and atraumatic.
Airway exchange

Our radiopaque exchange catheters are available in a wide range of sizes and are hollow to allow oxygen delivery during exchange.
Cook® Airway Exchange Catheter
Intended for endotracheal tube exchange in adult and pediatric patients.1

Product details
• The blunt tip of the radiopaque catheter is designed to be atraumatic to internal structures.
• The lumen and distal sideports are designed to deliver oxygen.
• The centimeter markings facilitate alignment with endotracheal tubes.
• The removable Rapi-Fit Adapter permits oxygen delivery during an exchange procedure, if necessary.1

Components
• Cook Airway Exchange Catheter
• Rapi-Fit® Adapter (15 mm connector)
• Rapi-Fit® Adapter (Luer lock connector)

*Endotracheal tube not included.

1. The 8 French catheter is recommended for placement of an endotracheal tube with an inner diameter of 3 mm or larger. When used for high-pressure oxygenation with a Luer lock connector, the 8 French catheter is recommended for patients older than 1 month of age.

The 11 French catheter is recommended for placement of an endotracheal tube with an inner diameter of 4 mm or larger. When used for high-pressure oxygenation with a Luer lock connector, the 11 French catheter is recommended for patients older than 2 years of age.

The 14 French catheter is recommended for placement of an endotracheal tube with an inner diameter of 5 mm or larger. When used for high-pressure oxygenation with a Luer lock connector, the 14 French catheter is recommended for patients older than 2 years of age.

The 19 French catheter is recommended for placement of an endotracheal tube with an inner diameter of 7 mm or larger. When used for high-pressure oxygenation with a Luer lock connector, the 19 French catheter is recommended for patients older than 12 years of age.

For complete instructions, age-specific recommendations, contraindications, warnings, and precautions, see the Instructions for Use included with each product.

Some products or part numbers may not be available in all markets. Contact your local Cook representative or Customer Support & Distribution for details.
Arndt Airway Exchange Catheter Set

The Arndt Airway Exchange Catheter Set is intended for exchange of a supraglottic airway device (SAD) to an endotracheal tube (ETT) under bronchoscopic assistance, and for ETT exchange in adult and pediatric patients. The product may be used for emergency, urgent, and elective airway management.¹

Product details
- Use of a bronchoscope provides visualization to facilitate navigation through the patient’s anatomy.
- The wire guide can be inserted through the working channel of the bronchoscope, which allows acute angles to be maneuvered.
- The distal sideports facilitate airflow.
- The removable Rapi-Fit Adapter permits the use of an oxygen source during an exchange procedure, if necessary.¹

Components
- Arndt Airway Exchange Catheter
- Amplatz Extra-Stiff Wire Guide
- Bronchoscopic port
- Rapi-Fit® Adapter (15 mm connector)
- Rapi-Fit® Adapter (Luer lock connector)

**Cook® Airway Exchange Catheter - Extra-Firm with Soft Tip**

Intended for endotracheal tube exchange in adult and pediatric patients.¹

### Product details
- The blunt, soft, and flexible tip of the catheter is designed to be atraumatic to internal structures.
- The distal section of the catheter is flexible.
- The extra-firm catheter facilitates the exchange of double lumen shaft tubes.
- The lumen and distal sideports are designed to deliver oxygen.
- The centimeter markings facilitate alignment with endotracheal tubes.
- The removable Rapi-Fit Adapters permit oxygen delivery during an exchange procedure, if necessary.¹

When you can’t intubate or ventilate, our tools help you gain emergency airway access.
Emergency airway

We offer a variety of emergency cricothyrotomy sets for use with Seldinger or surgical methods. Some of our sets include a cuffed airway catheter, and we offer products for emergency transtracheal airway catheter ventilation.
Melker Universal Cuffed Emergency Cricothyrotomy Catheter Set

Percutaneous/Surgical

Intended to establish emergency airway access when endotracheal intubation cannot be performed. Airway access is achieved utilizing either the percutaneous entry (Seldinger) technique or the surgical technique via the cricothyroid membrane.

**Product details**

- The universal set provides all the components you need in one package to perform a cricothyrotomy with either the Seldinger or the surgical technique.
- The cuffed catheter is designed to protect and control the airway after it is placed.

**Components**

- Melker Cuffed Emergency Cricothyrotomy Catheter
- Introducer needle
- PTFE catheter introducer needle
- 12 mL syringe
- #15 mini scalpel
- #20 safety scalpel
- Amplatz Extra-Stiff Wire Guide
- Blunt, curved dilator (surgical)
- Curved dilator (Seldinger)
- Trousseau dilator
- Tracheal hook
- Tracheostomy tape
- Needle holder cup
- Gauze sponges (10)
- 18 x 24 inch drape (45.7 x 60.9 cm)

Melker Cuffed Emergency Cricothyrotomy Catheter Set

Percutaneous

Intended to establish emergency airway access when endotracheal intubation cannot be performed. Airway access is achieved utilizing the percutaneous entry (Seldinger) technique via the cricothyroid membrane.

Product details

- This comprehensive set provides all the components you need in one package to perform a cricothyrotomy with the Seldinger technique.
- The cuffed catheter is designed to protect and control the airway after it is placed.

Components

**Melker Uncuffed Emergency Cricothyrotomy Catheter Set**

**Percutaneous**

Intended to establish emergency airway access when endotracheal intubation cannot be performed. Airway access is achieved utilizing the percutaneous entry (Seldinger) technique via the cricothyroid membrane.

### Product details

- This comprehensive set provides all the components you need in one package to perform a cricothyrotomy with the Seldinger technique.
- The uncuffed airway catheter comes in three sizes.

### Components

- Melker Emergency Cricothyrotomy Catheter
- Introducer needle
- PTFE catheter introducer needle
- 6 mL syringe
- #15 mini scalpel
- Amplatz Extra-Stiff Wire Guide
- Curved dilator
- Tracheostomy tape

Melker Cuffed Emergency Cricothyrotomy Catheter Set
Surgical

Intended to establish emergency airway access when endotracheal intubation cannot be performed. Airway access is achieved utilizing the surgical technique via the cricothyroid membrane.

Product details
- This comprehensive set provides all the components you need in one package to perform a cricothyotomy with the surgical technique.
- The set is supplied in a compact package for easy storage.
- The cuffed catheter is designed to protect and control the airway after it is placed.
