Enhance your diagnostic capabilities.

Cook's EchoTip® Ultra Endobronchial HD Ultrasound Needle is designed to enhance your diagnostic and staging capabilities. With its high echogenicity, the EchoTip® Ultra aids needle visualization, allowing you to more adequately assure the needle tip is within the target, which may improve cytological yields. The ergonomic handle and scope adapter can also optimise procedural performance, stability and security.
EchoTip® Ultra
ENDOBRONCHIAL HD ULTRASOUND NEEDLE

Olympus - Used to sample targeted submucosal and extramural lesions within or adjacent to the tracheobronchial tree or gastrointestinal tract through the accessory channel of an ultrasound endoscope for Fine Needle Aspiration.

Pentax - Used to sample targeted submucosal and extramural lesions within or adjacent to the tracheobronchial tree through the accessory channel of an ultrasound endoscope for Fine Needle Aspiration.

This device is supplied sterile and is disposable - intended for single use only.

- High Definition dimpling pattern for needle visibility
- Naturally contoured handle offers needle control & stability
- On scopes with metal luer hubs, the removable sheath adjuster allows direct connection to the scope
- On scopes with metal non-luer hubs, the sturdy scope adaptor design allows:
  - secure connection and procedural stability
  - suction and injection capability due to the airtight valve
- Integrated sheath adjuster offers compatibility with a full range of ultrasound endoscopes
