Convenience and efficiency for you and your patient.

With only a single anoscope insertion, multiple ligations if desired are facilitated with the time-saving ease of pre-loaded bands.
Used to ligate internal hemorrhoids facilitated by an anoscope in adult patients only.

Supplied non-sterile and is disposable - intended for single use only.

- Each kit contains a ligation bander with four pre-loaded latex bands, TriView anoscope and obturator. In addition, each procedure will require medical grade suction equipment, source of illumination and water-soluble lubricant.

- TriView anoscope positioning slot design offers anatomic compatibility with hemorrhoid locations in most adults.
