Mark the spot for radiation therapy.
Delivering targeted therapy

We realized that both endoscopists and radiation oncologists are always looking for better ways to more accurately and efficiently deliver targeted therapy to their patients. That’s why we developed the EchoTip Ultra Fiducial Needle. Now, in one procedure, you can place up to four fiducial markers that can be utilized for future therapeutic procedures.

**Fiducial markers potentially:**

- Increase the accuracy of radiation treatment
- Allow controlled, targeted radiation dose administration which may reduce radiation exposure for the patient
- Provide for improved patient outcomes because you can target the precise area
- Preserve healthy tissue by only targeting diseased tissue

**With the EchoTip Ultra Fiducial Needle:**

- Place up to four fiducial markers, potentially saving valuable procedure time when compared to traditional methods of manually loading fiducials
- Controlled, precise placement can be achieved due to the tactile feel when the marker is deployed
Place multiple fiducials in one procedure

The EchoTip Ultra Fiducial Needle is the first preloaded EUS-guided fiducial needle, so you do not have to pause to load fiducials after each placement. Based on benchtop modeling1, the flexible sheath design of the EchoTip Ultra Fiducial needle allows implicit placement of up to four preloaded fiducials in challenging anatomical locations under endoscopic ultrasound. This can potentially enhance your procedural efficiency, which can benefit you, radiation oncologists and your patients.

Collaborative education and training

We are always seeking to provide stimulating and productive educational opportunities for clinicians to enhance their knowledge of new technologies and learn about exciting new procedural techniques. Cook Medical’s Vista programs encourage physician and industry collaboration to improve patient care by sharing best practices. Vista programs foster collaboration among the best and the brightest gastroenterologists in the world who all share one common goal: Improving patient care.

We also share our experience in EUS to facilitate training and education through online resources in the following locations:
