Conveniently fitted with a DomeTip® and dedicated wire guide and injection lumens, the Tri-Tome pc delivers the exceptional access and injection capability you need to allow you to focus on better patient outcomes. And, on our Protector™ model, we’ve added insulation on the proximal portion of Tri-Tome’s cutting wire to reduce the incidence of contact between the cutting wire and the endoscope.
Tri-Tome pc®
TRIPLE LUMEN SPHINCTEROTOME

Used for endoscopic cannulation of the ductal system and for sphincterotomy.

- DomeTip is designed with anatomy in mind for smooth, easy access
- Custom 3-D forming wire for orientation
- Protector™ insulation on proximal portion of cutting wire decreases incidence of cutting wire contact with scope, reducing the risk of damage to the cutting wire and scope (available on TRI-25M-P)

### Tri-Tome pc® and Tri-Tome pc® Protector™
