Engineered for Strength

Our exclusive PETFLEX™ technology makes Hercules both strong and stageable. This first-of-its-kind technology utilizes PET - a material with high tensile strength - to create an optimal combination of hardness, durability and staging accuracy. As a result, Hercules generates greater radial force on a stricture at the same or lower pressures than other stageable balloon dilators.

Clinical Strength

With Hercules, our ultimate goal is to improve patient outcomes. Hercules’ exceptional dilating strength can deliver more effective dilation force to relieve your patient’s dysphagia and may improve longer-term luminal patency.

Choose Strength.

Rapid Deflation*

Hercules is fast. Rapid deflation is achieved by simply applying negative pressure. Even if removal begins prior to complete deflation, Hercules can easily be withdrawn into the endoscope.
