An innovative, efficient solution to EMR.

By combining a multi-band ligator with a snare, the Duette allows you to perform simple ligation and snare resection of superficial lesions and early cancers in the upper GI tract. Duette is simple and efficient, two attributes that can help you achieve positive outcomes in your endoscopic mucosal resection procedures.
Duette®
MULTI-BAND MUCOSECTOMY

Used for endoscopic mucosal resection in the upper GI tract.
The snare component is supplied sterile and the banding component
is supplied non-sterile. Intended for single use only.
• Easy set-up, similar to Saeed Six-Shooter® Multi-Band Ligator
• Six latex rubber bands for resection of large lesions
• Soft, mini-hexagonal, braided snare cuts cleanly and has excellent
  shape retention even with repeated resections
• Snare available in 5 FR and 7 FR sizes
• Snare may be passed through ligator handle allowing for speedy
  resection of ligated tissue without removal of endoscope or
  disassembly of components
