Restore patient tissue.¹

**Promotes remucosalization**
Remucosalization at the nasal septum donor site significantly improved early and overall by 10.03% at 2 weeks and 8.13% across 12 weeks, respectively.²

**Excellent handling**
Biodesign material is easy to manipulate, allowing for improved surgical precision during graft placement.³

**Multiple indications**
Published data supports indications for both nasoseptal perforation repair and upper airway tissue remodeling.²,³
**Biodesign® Sinonasal Repair Graft**

Tips to help get the best possible results:

- Ensure adequate blood supply.
- Size the graft to allow for tissue overlap.
- Place the graft dry and then hydrate with sterile saline.

### Available Product Sizes

Shown at actual size.

(Also available in 7 x 10 cm.)
