Restore patient tissue.¹

Promotes remucosalization
Remucosalization at the nasal septum donor site significantly improved early and overall by 10.03% at 2 weeks and 8.13% across 12 weeks, respectively.²

Excellent handling
Biodesign material is easy to manipulate, allowing for improved surgical precision during graft placement.³

Multiple procedures
Published data supports applications for both nasoseptal perforation and donor site repair.²,³
### Biodesign® Sinonasal Repair Graft

**Tips to help get the best possible results:**

- Ensure adequate blood supply.
- Size the graft to allow for tissue overlap.
- Place the graft dry and then hydrate with sterile saline.
