Adapt to the anatomy during amniotomy.

ObstiHook™
AMNION PERFORATOR

**Flexible Shaft**
The shaft gives you extra flexibility to access various patient anatomies, such as posterior cervixes and obtuse cervical angles.

**Ribbed Handle**
The handle’s ridges give you increased control throughout the amniotomy.

**Sharp Hook**
The rounded tip and recessed hook are designed to protect both the fetus’s head and the mother’s uterine anatomy.

Perform your amniotomies with a perforator that gives you added flexibility and control. The ObstiHook™, a flexible amniotomy hook, gives you the ability to accommodate a wide range of cervical angles and positions.

- The shaft gives you extra flexibility to access various patient anatomies, such as posterior cervixes and obtuse cervical angles.
- The handle’s ridges give you increased control throughout the amniotomy.
- The rounded tip and recessed hook are designed to protect both the fetus’s head and the mother’s uterine anatomy. The sharp hook allows you to efficiently rupture the amnion.
- The reinforced neck gives the perforator added strength for insertion.
- The ObstiHook is packaged in dispenser boxes of 100 perforators for grab-and-go convenience.
