

By the Numbers:

# Prostate Cancer

In honor of Movember, take a moment to learn about the prevalence of prostate cancer in the U.S. Help bring these numbers down by raising awareness. If you're male, get screened. If you're female, ask your husbands, fathers, and brothers to get screened.

About  
**233,000**  
new cases of prostate  
cancer will be diagnosed

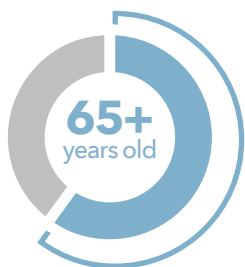

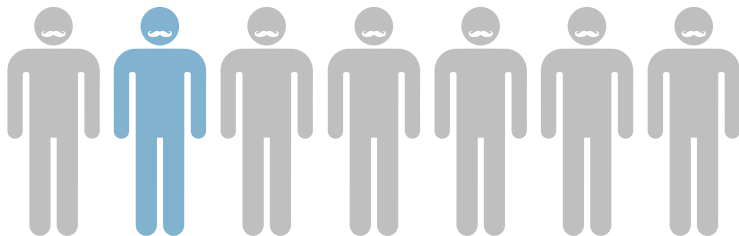

About  
**29,480**  
men will die of  
prostate cancer

More than

## 2.5 million men in the United States

who have been diagnosed with prostate cancer at some point are still alive today

**1 in 7**  
men will be  
diagnosed  
during his  
lifetime

About  
**6 in 10**  
cases are  
diagnosed  
in men aged  
65 or older

Average age  
at diagnosis

About  
**1 in 36**  
men will  
die of  
prostate  
cancer

Men over 40 with a family history should consider getting screened, and all men should be screened by age 50. If caught early enough, prostate cancer is treatable, and beatable! The five-year survival rate is nearly 100 percent.
