Uterine Fibroid Embolization (UFE)

2016 CODING AND REIMBURSEMENT GUIDE

Coverage, coding and payment for medical procedures and devices can be confusing. This guide was developed to assist with Medicare reporting and reimbursement when performing transcatheter peripheral embolization or occlusion procedures. If you have any questions, please contact our reimbursement team at 800.468.1379 or by e-mail at Reimbursement@cookmedical.com.

Coverage

Medicare carriers may issue local coverage decisions (LCDs) listing criteria that must be met prior to coverage. Physicians are urged to review these policies (http://www.cms.hhs.gov/mcd/search.asp?) and contact their carriers’ medical directors (www.cms.hhs.gov/apps/contacts) or commercial insurers to determine if a procedure is covered.

Coding

In 2014 bundled codes were created for embolization and occlusion services in response to recommendations from relevant professional medical societies. Included in the new codes is all radiological supervision and interpretation; intraprocedural guidance and roadmapping; imaging to document the completion of the procedure; and moderate sedation.

The Current Procedural Terminology (CPT®) code used to describe uterine fibroid embolization is:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>37243</td>
<td>Vascular embolization or occlusion, inclusive of all radiological supervision and interpretation, intraprocedural roadmapping, and imaging guidance necessary to complete the intervention; for tumors, organ ischemia, or infarction</td>
</tr>
</tbody>
</table>

37243 does not include vessel selection and catheter placement(s); ultrasound guidance for vascular access; diagnostic studies (eg, diagnostic angiography or venography); chemotherapy administration (eg, 96420); or injection of a radioisotope (eg, 79445).1

Do not report 37243 in conjunction with 75894, 75898 in the same surgical field.

For embolization procedures of the central nervous system or head and neck, see 61624, 61626, 61710.1
