2018 CODING AND REIMBURSEMENT GUIDE

Cook Medical manufactures medical devices that may be used in different maternal and fetal diagnostic and therapeutic procedures. The table below identifies a number of Cook Medical devices and the procedures in which they are intended to be used. Without a patient's actual medical record, it is impossible to know exactly how a given device was used or exactly what procedure was performed and, consequently, how the procedure should be coded. This table is not intended to suggest how any given procedure using one of these Cook Medical devices should be coded for billing purposes. If you have any questions, please contact our reimbursement team at 800.468.1379 or by e-mail at reimbursement@cookmedical.com.

Outpatient Hospital and Physician
