

Zilver® Vena™ Venous Stent

2023 CODING AND REIMBURSEMENT GUIDE

Coverage, coding and reimbursement for medical procedures and devices can be confusing. This guide was developed to assist you in correctly reporting and obtaining appropriate Medicare reimbursement for venous stent placement and adjunct procedures. If you have any questions, please contact our reimbursement team at 833.585.2688 or by e-mail at Reimbursement@cookmedical.com.

Coverage

Medicare carriers issue local coverage decisions (LCDs) listing coverage criteria for certain procedures. Physicians are urged to review their local carrier coverage policies (<http://www.cms.hhs.gov/mcd/search.asp?>) and/or contact their local carrier medical directors (<http://www.cms.hhs.gov/apps/contacts/>) or commercial insurers to determine if a procedure is covered.

Coding

Venous Stenting

37238	Transcatheter placement of an intravascular stent(s), open or percutaneous, including radiological supervision and interpretation and including angioplasty within the same vessel, when performed; initial vein
+37239	Transcatheter placement of an intravascular stent(s), open or percutaneous, including radiological supervision and interpretation and including angioplasty within the same vessel, when performed; each additional vein (List separately in addition to code for primary procedure)

For placement of a stent(s) within the peripheral segment of the dialysis circuit, see 36903, 36906

IVUS

+37252	Intravascular ultrasound (noncoronary vessel) during diagnostic evaluation and/or therapeutic intervention, including radiological supervision and interpretation; initial noncoronary vessel (List separately in addition to code for primary procedure)
+37253	Intravascular ultrasound (noncoronary vessel) during diagnostic evaluation and/or therapeutic intervention, including radiological supervision and interpretation; each additional noncoronary vessel (List separately in addition to code for primary procedure)

Venous Mechanical Thrombectomy

37187	Percutaneous transluminal mechanical thrombectomy, vein(s), including intraprocedural pharmacological thrombolytic injections and fluoroscopic guidance (Do not report 37187 in conjunction with 76000, 96375)
37188	Percutaneous transluminal mechanical thrombectomy, vein(s), including intraprocedural pharmacological thrombolytic injections and fluoroscopic guidance, repeat treatment on subsequent day during course of thrombolytic therapy (Do not report 37188 in conjunction with 76000, 96375)

Helpful Venous Mechanical Thrombectomy Coding Tips

- Use code 37187 to report the initial application of venous mechanical thrombectomy.¹
- To report bilateral venous mechanical thrombectomy performed through a separate access site(s), use modifier -50 in conjunction with 37187.¹
- For repeat treatment on a subsequent day during a course of thrombolytic therapy, use 37188.¹
