It is my pleasure to announce that Cook General BioTechnology has reached an agreement to transfer the Genome Resources sperm storage bank to ReproTech, Ltd. Your banked sperm samples are now in the hands of an expert team with almost 30 years of experience in long-term cryo-banking. ReproTech is a specialty provider of cryo-banking services and the only service in the nation that focuses exclusively on storage of reproductive tissue.

We would like to thank you for the years of trust you placed in Cook General BioTechnology to store your banked samples. We greatly appreciate the opportunity to have provided these services to you. Please be aware that ReproTech will now be your main point of contact for all requests for transfer to clinics and billing related questions. If you have any questions, please feel free to contact ReproTech at 888-489-8944 or through www.reprotech.com.

Best regards,
