

Tuesday, November 15

SESSION 2

8:08 am - 8:13 am *Endovascular arch repair after open repair of Type A Aortic Dissection (TAAD): Indications, precautions, and results*

Presented by: Stephan Haulon, MD

SESSION 10

8:57 am - 9:02 am *Comparison of available iliac branched devices (IBDs) for iliac aneurysms and hypogastric revascularization: Advantages and limitations of each*

Presented by: Timothy A. Resch, MD, PhD

SESSION 3

9:15 am - 9:20 am *5-year update of STABLE I and 2-year update of STABLE II trials of 2-component TEVAR with proximal covered and distal bare stents (Petticoat Concept) for acute TBADs: Are there advantages and limitations?*

Presented by: Joseph Lombardi, MD

SESSION 11

9:55 am - 10:00 am *Comparison of AAA sac shrinkage after fenestrated EVAR (F/EVAR) and standard EVAR: F/EVAR wins*

Presented by: Neal S. Cayne, MD

Relax and Explore

Tuesday, November 15

SESSION 12

10:20 am - 10:25 am *Current status of the only FDA-approved fenestrated graft (ZFEN from Cook) that is commercially available in the US: How is its general adoption doing?*

Presented by: Andres Schanzer, MD

10:26 am - 10:31 am *With ZFEN F/EVAR, a large SMA scallop can cause problems: What are they and what is the solution?*

Presented by: Carlos H. Timaran, MD

10:32 am - 10:37 am *What is a hostile infrarenal neck and when should F/EVAR be done rather than standard EVAR?*

Presented by: Matthew J. Eagleton, MD

SESSION 4

11:22 am - 11:27 am *Expanding midterm experience with fenestrated and branched EVAR (F/BEVAR) for TAAAs from chronic TBADs: Advantages and limitations*

Presented by: Eric L.G. Verhoeven, MD, PhD

SESSION 7

4:15 pm - 4:20 pm *Value of branched endografts (from Cook) for treating TAAAs: Lessons learned, long-term results, advantages, and limitations*

Presented by: Timothy A.M. Chuter, MD

Relax and Explore

Wednesday, November 16

SESSION 23

6:40 am - 6:45 am *Some CLI patients are better managed without revascularization: Which ones*

Presented by: Frank J. Criado, MD, FACS, FSVM

7:22 am - 7:27 am *True lumen vs. subintimal routes for lower extremity interventions above-the-knee (ATK) and below-the-knee (BTK): What is durability of BTK interventions?*

Presented by: Marco G. Manzi, MD

SESSION 39

7:36 am - 7:41 am *What does volume analysis of true and false lumens tell us after standard and petticoat (composite) TEVAR for acute TBADs*

Presented by: Stephan Haulon, MD

SESSION 24

8:10 am - 8:15 am *New findings from the RCT of the Zilver PTX stent vs. PTA and bare-metal stents: Interesting findings from subanalyses and 5-year result show widening benefits from the DES*

Presented by: Gary M. Ansel, MD / Michael D. Dake, MD

Relax and Explore

Wednesday, November 16

SESSION 24

8:16 am - 8:21 am *RCT comparing Zilver PTX DES and surgical bypass for long fempop lesions suggest better results in the DES arm: Is it due to differences in the method of patency assessment: The ZILVERPASS Trial*

Presented by: Koen Deloose, MD / Marc Bosiers, MD / Patrick Peeters, MD

8:22 am - 8:27 am *Update on the 2-year results of the Eluvia DES from Boston Scientific for SFA lesions: Why are the results so superior to POBA: From the MAJESTIC Trial: What is happening with the IMPERIAL Trial comparing Eluvia and Zilver PTX DES*

Presented by: Stefan Müller-Hülsbeck, MD

SESSION 25

9:40 am - 9:45 am *What is the best treatment for long or calcified SFA lesions causing CLI: The role of DCBs, DESs, atherectomy and Supera BMSs*

Presented by: Koen Deloose, MD / Marc Bosiers, MD

SESSION 41

9:48 am - 9:53 am *Failure modes after branched EVAR (B/EVAR) for TAAAs and how they can be prevented*

Presented by: Matthew J. Eagleton, MD / Tara M. Mastracci, MD

Relax and Explore

Wednesday, November 16

SESSION 26

10:19 am - 10:24 am *DEBATE: How best to manage complex femoropopliteal lesions: A vascular surgeon's perspective*
Presented by: Scott L. Stevens, MD

SESSION 41

10:24 am - 10:29 am *Technical tips for making standard F/EVAR and F/EVAR after failed EVAR: Simpler, safer, and better*
Presented by: Timothy A. Resch, MD, PhD

10:36 am - 10:41 am *How to obtain adequate reimbursement for F/EVAR procedures in the US*
Presented by: Francesco A. Aiello, MD

SESSION 26

10:49 am - 10:54 am *Importance of vessel preparation with DCBs: Value of Enforcer scoring balloon (Cook) and atherectomy with DCBs: Effect of calcium on DCBs efficacy: Does the Lutonix DCB work on BTK arteries?*
Presented by: Fabrizio Fanelli, MD, EBIR

11:36 am - 11:41 am *DEBATE: Not so fast: The BEST-CLI trial may not be so valuable, and here is why*
Presented by: Mehdi H. Shishehbor, DO, MPH, PhD

Relax and Explore

Wednesday, November 16

SESSION 27

1:48 pm - 1:53 pm *New approaches to limb salvage in advanced CLI due to very distal disease: Transcollateral, pedal loop, and small artery access in the foot: How durable is the patency of PTAs done by these approaches?*

Presented by: Marco G. Manzi, MD

SESSION 44

2:30 pm - 2:35 pm *DEBATE: On-label use (within the IFU) of endografts for EVAR is key to achieving good results*

Presented by: Andres Schanzer, MD

SESSION 45

3:10 pm - 3:15 pm *Edited live case with the use of the Zenith Alpha Thoracic Endograft in conjunction with a 4X fenestrated graft in a TAAA*

Presented by: Eric L.G. Verhoeven, MD, PhD

Relax and Explore

Thursday, November 17

SESSION 55

6:40 am - 6:45 am *The CHAP Project (Characterization of Human Aortic Anatomy Project): How well are current EVAR devices able to deal with patient diversity*
Presented by: Thomas S. Maldonado, MD

6:50 am - 6:55 am *EVAR durability: Up to 14-year follow-up with the Zenith Flex AAA endograft*
Presented by: Fabio Verzini, MD, PhD

SESSION 47

6:52 am - 6:57 am *What are the components of a stent's radial force and why do they matter?*
Presented by: Koen Deloose, MD

SESSION 55

6:55 am - 7:00 am *The Cook Zenith Alpha AAA endograft system: Advantages, limitations and 1-year results*
Presented by: Eric L.G. Verhoeven, MD, PhD

SESSION 48

7:46 am - 7:51 am *DEBATE: Parallel grafts are of limited value in juxta- and pararenal AAAs and TAAAs: Results with them are not so good or durable in some circumstances*
Presented by: Adam Beck, MD / W. Anthony Lee, MD

Relax and Explore

Thursday, November 17

SESSION 55

8:05 am - 8:10 am *Results with the Cook Zenith IBD to preserve hypogastric flow: The PRESERVE II trial and a 10-year European experience: Advantages and limitations*
Presented by: W. Anthony Lee, MD /
Fabio Verzini, MD, PhD

SESSION 48

8:35 am - 8:40 am *DEBATE: Not so: F/BEVARs are the best treatments for most juxta- and pararenal AAAs*
Presented by: Marcelo Ferreira, MD

SESSION 57

10:18 am - 10:23 am *Results of ascending aortic endografting with a dedicated Cook endograft: Indications, limitations, and results*
Presented by: Tilo Koelbel, MD, PhD /
Sebastian E. Debus, MD, PhD

SESSION 58

11:30 am - 11:35 am *Cook Zenith Alpha low-profile endograft system for TEVAR: Advantages, limitations, and clinical results in Europe and the US*
Presented by: Giovanni Torsello, MD, PhD /
W. Anthony Lee, MD

Relax and Explore

Thursday, November 17

SESSION 58

- 11:36 am - 11:41 am *Lower-profile deployment systems and small diameter endografts facilitate TEVAR treatment of blunt aortic injuries in young people: Is the Zenith Alpha System a game changer: Are there other systems as good?*
Presented by: Benjamin W. Starnes, MD

SESSION 60

- 2:18 pm - 2:23 pm *New distal filter embolic capture device and other tips and devices to facilitate lower extremity and pedal interventions: 2.9 Fr sheath and compatible balloon, off-road reentry device, etc.*
Presented by: Andrej Schmidt, MD
- 3:00 pm - 3:05 pm *Japanese trial of the Zilver PTX stent in 974 patients - some with long difficult lesions: 3-year results confirm its value*
Presented by: Kimihiro Komori, MD, PhD
- 3:06 pm - 3:11 pm *Status of DES for infrapopliteal arteries: The self-expanding paclitaxel-eluting Stentys stent from Spectranetics is better than BMS: >1-year results from the PES-BTK-70 Trial Show It*
Presented by: Patrick Peeters, MD

Relax and Explore

Friday, November 18

SESSION 88

9:59 am - 10:04 am *An update on VIVO-EU: The Zilver Vena Venous Stent Study in Europe*
Presented by: Gerard J. O'Sullivan, MD

10:23 am - 10:28 am *DEBATE: Femoral vein stenting succeeds under these conditions*
Presented by: Brian G. DeRubertis, MD

SESSION 81

10:18 am - 10:23 am *The future of vascular imaging and guidance: Where are they going?*
Presented by: Alan B. Lumsden, MD, FACS

10:24 am - 10:29 am *DEBATE: Ultrasound imaging and guidance are the best methods to control retrograde distal access procedures and crossing CTOs: Tips and tricks*
Presented by: Jihad A. Mustapha, MD

SESSION 90

1:00 pm - 1:05 pm *Experimental insights into acute DVT and Post-Thrombotic Syndrome (PTS)*
Presented by: Peter Henke, MD

Relax and Explore

Friday, November 18

SESSION 83

1:18 pm - 1:23 pm *An update on an improved classification system, TEVAR devices and techniques for Blunt Thoracic Aortic Injury (BTAI)*
Presented by: Ali Azizzadeh, MD /
Benjamin W. Starnes, MD

Saturday, November 19

SESSION 103

1:30 pm - 1:35 pm *F/BEVAR to salvage failed infrarenal endo and open AAA repairs, and why is 3- or 4- fenestrated FEVAR better than 2-fenestration FEVAR?*
Presented by: Eric L.G. Verhoeven, MD, PhD /
Athanasios Katsargyris, MD
